ITALIAN STYLE IS COOL

VERONA OVERVIEW DOORS

Multidecks

The VERONA OVERVIEW is produced with a new upper profile with minimal and gently squared lines, which bring panoramic views and give visibility to the product. The new top profile will be 34 mm high and will be used both in the configurations with doors and without doors of this multidecks. This model presents structural innovations that are not only aesthetic but also functional like the new bumper trolley which will be integrated into the front of the wall case, as for the entire new production. The assembly that makes up the price holder will also be new with a different hooking system.
